DETAILED ACTION

1. This action is in response to Applicant's amendment received on 10 May 2002.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11, 14 and 15, drawn to specific connecting means, classified in class 83, subclass 493.
 - II. Claim 13, drawn to a specific roller means, classified in class 83, subclass 306.
 - III. Claim 12, drawn to a specific drum configuration, classified in class 83, subclass 507.

Claims 10, 16 and 17 will be examined with any of Groups I-III.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the specific connecting means of group II could be employed without the specific drum configuration of group IV, and conversely, the specific drum configuration of group IV could be employed without the specific connecting means of group II. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
